**35<sup>TH</sup>**  
**President**  
OF  
**THE NIGERIAN SOCIETY  
OF ENGINEERS**

**Date:**  
Saturday,  
17th January, 2026

**Time:**  
10:00am Prompt

**Venue:**  
Banquet Hall, Aso Rock  
Presidential Villa, Abuja.

55<sup>TH</sup>

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

## NATIONAL ANTHEM

Nigeria, we hail thee,  
Our own dear native land,  
Though tribe and tongue may differ,  
In brotherhood we stand,  
Nigerians all, and proud to serve  
Our sovereign Motherland.

Our flag shall be a symbol  
That truth and justice reign,  
In peace or battle honoured,  
And this we count as gain,  
To hand on to our children  
A banner without stain.

O God of all creation,  
Grant this our one request,  
Help us to build a nation  
Where no man is oppressed  
And so with peace and plenty  
Nigeria may be blessed.

## THE NATIONAL PLEDGE

I Pledge To Nigeria My Country  
To Be Faithful, Loyal And Honest  
To Serve Nigeria With All My Strength  
To Defend Her Unity  
And Uphold Her Honour And Glory  
So Help Me God.

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

## BRIEF HISTORY OF The Nigerian Society of Engineers

### INTRODUCTION

Founded in 1958, The Nigerian Society of Engineers (NSE) is the umbrella organization for the Engineering Profession in Nigeria. Like some of its counterparts in other professions, the Society has distinguished itself through progressive and imaginative programmes to become the avenue for true professional development of its members as well as the technological development of the country.

### OBJECTIVE

The objective of the Society is to promote the advancement of Engineering Education, Research and Practice in all its ramifications. Naturally, this is with a view to maintaining and enhancing the professional capabilities of its members so as to better equip them to fulfil the needs of the profession for the good of the public and the nation.

### MEMBERSHIP

Membership is open to all who possess qualifications that are accredited by the Council for the Regulation of Engineering in Nigeria (COREN), under the provisions of Engineering Registration Decree (No. 55) of 1970 or such amendments thereof irrespective of race, tribe or religion. There are seven grades of membership - Fellow, Corporate, Associate, Graduate, Student, Corporate Firm and Honorary Fellow.

### ORGANIZATION

The highest policy making body is the Council which comprises elected National Executive Members, Branch/Division Chairmen, Representatives of other Engineering Bodies/

Institutions and some nominated Active Corporate Members. The President is the Head of Council. Overall coordination of the Society's activities is carried out from the Secretariat currently housed at the National Engineering Centre, Abuja. The Society also has a Liaison Office at the National Engineering Centre, Lagos. A full- time Executive Secretary heads the Secretariat.

### DIVISIONS

As an umbrella organization, all the disciplines of the profession as currently practiced in the country are duly catered for. The various disciplines are organized as Divisions of the Society to enhance individual career development. Currently, the Society has twenty-five (25) professional Divisions.

### BRANCHES

The Society is also organized into Branches based in various cities around the country to cater for the local activities of the members. The following 81 Branches are in existence: Aba, Abeokuta, Abakaliki, Abuja, Ado-Ekiti, Aguata, Ajaokuta, Akure, Apapa, Asaba, Auchi, Awka, Bauchi, Benin, Bida, Birni-Kebbi, Bonny, Bwari, Calabar, Damaturu, Dutse, Egbun, Eket, Ekpoma, Enugu, Gin, Glasgow, Gombe, Gusau, Houston, Ibadan, Ikeja, Ikot Abasi, Ikot Ekpene, Ile-Ife, Ilesha, Ilano, Ilorin, Jalingo, Jos, Kabuga, Kaduna, Kano, Kafanchan, Katsina, Lafia, Lagos, Lokoja, London, Maiduguri, Manchester, Maitama, Makurdi, Minna, Mowe, New Bussa, Nnewi, Nsukka, Omoku, Onitsha, Ogbomosho, Oshogbo, Ota, Owen-i, Omu-Aran, Orlu, Oluyole, Okigwe, Oyo, Port-Harcourt, Sapele, Sokoto, Umuahia, Ughelli, Uyo, Victoria Island, Warn, Wudil, Yenagoa, Yola and Zaria.

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

## SECRETARIAT

The Nigerian Society of Engineers Secretariat is headed by the Executive Secretary who runs a management structure of three Directorates, namely: Corporate Services Directorate (CSD), Membership Services Directorate (MSD) and Professional Development Directorate (PDO). The three Directorates have Departments, Units and Specialised Desks under them for effective delivery of routine services and execution of Council policies.

## ACTIVITIES

**PUBLICATIONS:** The Society publishes a Quarterly magazine: "The Nigerian Engineer". Others include the Technical Transactions Journal, NSE Newsletter/e-Newsletter, Annual Conference and Seminar Proceedings, October Lecture Series, History of the NSE and some other ad hoc publications.

## WORKSHOPS/CONFERENCES

These are organized nationwide and coordinated by the National Secretariat, and are geared towards professional improvement and continuing education amongst members. One of the special events is the biennial October Lecture normally delivered by a Past President of the society. The Society holds an annual Conference based on a chosen theme at a predetermined venue and date. This is also a forum for Engineers to exchange ideas and update their knowledge on contemporary issues and future developments in Engineering. The weeklong event is rounded off with the Annual General Meeting/AGM during which officers are elected.

## ADVISORY SERVICES

NSE provides guidance to members on a wide range of matters relevant to their engineering practice. Government, Corporate Organizations and the general public may also seek advice of the Society on professional Engineering matters.

## BENEVOLENT FUND

The Society maintains a benevolent fund to which individual members contribute. The fund is to help members and their families, who are in distress.

## AWARDS AND PRIZES

Grants/Fellowship Awards and Prizes for papers, research and other contribution to the profession are awarded by the NSE from time to time, to those who distinguish themselves in the profession.

## COMPETITIONS

The Society sponsors and encourages competitions at various educational levels -- from Secondary Schools through Universities to professional institutions.

## CODE OF ETHICS

NSE has established a Code of Ethics to control the professional conduct of her members. Disciplinary actions are instituted under this code. The Society launched the "Campaign against Corruption in Engineering Projects (CACEP) in 1998, as part of its contribution in the fight against corruption which hinders rapid development of the country.

## LIAISON WITH GOVERNMENT

The Society liaises with Government on matters affecting the Engineering profession and represents the profession on the boards of some government bodies/agencies. It maintains close relations with COREN in all issues relating to the profession. These include Engineering Regulation & Monitoring (ERM), Mandatory Continuing Professional Education (MCPE) and remuneration for Engineers.

## INTERNATIONAL RELATIONS

The Society represents Nigeria through her membership of the Commonwealth Engineers Council (CEC) and the World Federation of Engineering Organizations (WFEO). NSE is also a member and houses the Secretariat of Federation of African Engineering Organizations (FAEO).

## Vision

The Nigerian Society of Engineers shall be one of the very best Engineering Professional bodies in the World

## Mission

The Nigerian Society of Engineers is dedicated to providing quality service aimed at enhancing professional competence and development of its members at all times .

The Nigerian Society of engineers is committed to focus collaboration with, influencing and providing quality advice to the various arms of Government, Industry, Commerce, academia and the Society at large, for the purpose of uplifting the country as a whole. The Nigerian Society of Engineers shall make meaningful contributions to the advancement of technology worldwide.

55<sup>TH</sup>

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

### Corporate Objectives

In alignment with the strategic agenda of The Nigerian Society of Engineers to continually empower its teaming members, achieve growth, improved collaboration and the advancement of engineering in Nigeria, the Society is committed to the following measurable objectives:

- i) To achieve at least 5% increase in membership annually;
- i) To reduce inactive membership by 15% annually through targeted membership drive programmes;
- ii) To train at least 5,000 members across the different membership categories annually to close identified knowledge and skill gaps;
- iii) To improve membership participation in continuous professional development programmes by at least 10% annually;
- iv) To achieve at least 85% satisfaction rating in membership perception surveys at all instances;
- v) To establish strategic partnership with at least five (5) new government agencies, industry, academia and other nongovernmental organizations annually;
- ii) To improve visibility in the conventional and non-conventional media by 30% annually;
- iii) To foster stronger global collaboration by participating in at least four (4) international engineering federation forums annually;
- iv) Achieve full compliance with all statutory and regulatory obligations at all times.

13:15	Departure

*Profile of*

**ENGR. ALI ALIMASUYA RABIU, FNSE, F.ASCE, FAEng, MFR**

Engr. Ali Alimasuya Rabiu, who was born on the 24th of April, 1963 in Lafia, Nasarawa State, attended Bayero University, Kano in Kano State from where he obtained a Bachelor's Degree in Civil Engineering and a Master's in Business Administration (MBA). He is a COREN registered Engineer and a Fellow of Nigerian Society of Engineers (FNSE), Fellow of American Society of Civil Engineers (F.ASCE), Fellow of the Nigerian Academy of Engineering (FAEng), Fellow of Nigerian Institution of Civil Engineers (FNICE), Fellow, Nigerian Institute of Management (MNIM), Fellow of the Academy of Natural Sciences and Engineering (FANSEN), Member, Nigerian Water & Sanitation Association (MNIWASA), Member, Association of Consulting Engineers, Nigeria (ACEN), a recipient of the National Honour of the Member of the Order Federal Republic of Nigeria, (MFR), among others.

For his many contributions to the community and his novel works in his home State of Nasarawa, he was honoured with the traditional title of Cigarin Lafia by HRH, Late Emir of Lafia, Alh. Isa Mustapha Agwai 1. He is a recipient of various professional awards and recognitions.

He has held some key positions such as: Member, Presidential Monitoring Team on DFRRRI Rural Water and Sanitation Programme, Sokoto and Kebbi States, Consultant/Member, House of Representatives Adhoc Committee on the investigation of flooding of the Goronyo Dam, Sokoto State, Member, Governing Council, Federal College of Education (Technical), Bichi, Kano State. Chairman, Nigerian Society of Engineers, Kano Branch, Chairman, Technical Committee to assess the damages/loses caused by Fire outbreak at Muhammadu Abubakar Rimi Market, Kano State to mention but few.

Engr. Rabiu has a robust professional career in engineering, spanning over 30 years, which include service in various administrative and managerial capacities in the public

and private sectors. Some of the positions he has held include: Executive Partner, AR – AR Partnership, a Consulting Engineering firm; Senior Engineer, Aminu Kano Teaching Hospital Project; Project Coordinator, Bayelsa State Infrastructural Development Programme; Project Manager, Hotoro South Erosion Control Project, Kano State; Project Manager, Oforachi Irrigation Project, Kogi State; Project Manager, World Bank-Assisted Nasarawa State Community-Based Urban Development Project, Karu; Project Director, Nasarawa State Massive Programme on Road Construction, to mention a few.

He has been involved in the design and supervision of several bridges, roads, concrete structures, water supply schemes, small dams, flood and erosion control works, environmental sanitation projects and community development programmes across the country.

He held several leadership positions within the Kano Branch of the Nigerian Society of Engineers (NSE), culminating in his emergence as Branch Chairman in 2006. He also served three consecutive terms as a Vice President of the NSE, with responsibilities spanning management, policy formulation, and the professional development of members of the Society.

Engr. Rabiu was nominated by the Nasarawa State Government in April 2016 to represent the North Central Geo-political Zone on the Council for the Regulation of Engineering in Nigeria (COREN). He was subsequently elected President of COREN in 2019. A dedicated and purpose-driven leader, he demonstrated exceptional administrative acumen and played a pivotal role in strategic stakeholder engagement for the new COREN Act, 2018, securing widespread support from engineering practitioners across the country. He also advanced several inherited projects and initiatives, including the pursuit of COREN's admission into the International Engineering Alliance as a signatory to the Washington Accord. Under his leadership, COREN evolved into a multifaceted institution renowned for its operational efficiency and enhanced regulatory capacity; a transformation that earned it board representations across several organizations.

At the community level, Engr. Rabiu was appointed Chairman of the Visitation Panel to Isa Mustapha Agwai Polytechnic, Lafia, in October 2023 by His Excellency, the Governor of Nasarawa State, Engr. Abdullahi A. Sule, FNSE. He successfully completed the assignment, and the Panel's recommendations, some of which were implemented by the State Government, helped to resolve the protracted crisis in the institution.

He was elected as the Deputy President of the Society for two-year tenure in November 2023 and served as the Chairman, Finance and Budget Board for the period. He assumes as the President of NSE on the 1st January, 2026.

He is married and blessed with children.

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

## *Inaugural Address of*

**ENGR. ALI ALIMASUYA RABIU, FNSE, F.ASCE,  
FAEng, MFR (CIGARIN LAFIA),  
AS THE 35TH PRESIDENT OF  
THE NIGERIAN SOCIETY OF ENGINEERS,**

ON SATURDAY, 17TH JANUARY, 2026

### **TITLED: RESETTING THE NSE**

#### Protocols

Distinguished Ladies and Gentlemen, today we celebrate the Nigerian Society of Engineers (NSE): we honour our proud heritage and traditions even as we boldly chart a new course for the future. This is more than a ceremonial gathering—it is the beginning of a deliberate effort to reset the NSE, strengthen its foundations, and reposition it for relevance in national development. It is a time to reflect on the great leaders and values that brought us here, and a moment to recommit ourselves to a stronger, more impactful Society built on unity, innovation, and accountability.

Let me take a moment to acknowledge the outstanding leadership of the immediate past President, Engr. Margaret Aina Oguntala, FNSE. Her tenure brought renewed visibility, professionalism, and strategic thinking to the NSE. Over the past two years, I had the privilege of working closely with her, and I can personally attest to her ingenuity, resilience, and commitment to excellence. She served with clarity of purpose and a collaborative spirit that strengthened the fabric of our Society. As she transitions into her next chapter, I wish her continued success and thank her sincerely for her service to the profession.

I approach today's investiture as the 35th President of the Nigerian Society of Engineers with deep honour and a renewed sense of responsibility. Having served as President of the Council for the Regulation of Engineering in Nigeria (COREN), many believed my journey in engineering leadership had reached its natural conclusion. I, too, felt that way, until I was compelled by a wave of concerned and passionate engineers who could no longer ignore the gradual drift of our great Society from its core ideals. They spoke of a Nigerian Society of Engineers that once stood as a beacon of excellence and national relevance, but which had begun to lose focus and momentum. Their message was clear: the time had come to reset the NSE, to rebuild it into a Society driven by standards,

75<sup>TH</sup>

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

led by ideas, and guided by values. That call for institutional renewal, bold reforms, and strategic repositioning moved me to act, against my own inclination, but in full obedience to purpose. This return is not driven by ambition, but by conviction. Today, I reaffirm that commitment, with clarity, courage, and a deep sense of duty.

In recent years, our Society has made commendable progress through various reform efforts. These steps have laid a necessary foundation, but this moment demands more. It requires strategic clarity, bold thinking, and a deeper connection to national priorities. As President, I am committed to leading this reset with focus and conviction, building an institution that sets engineering standards, drives innovation, and delivers measurable value to members. This is the spirit of the Rabiu Presidency - Resetting the NSE for relevance, resilience, and national impact.

The **NSE Strategic Document**, recently approved by the Council, provides a bold 10-year blueprint for the future of our Society. It is a product of thoughtful consultation, professional insight, and a shared desire to reposition the NSE as a leading force in national development. This document is not just aspirational—it is directional. It defines the structure upon which our actions, policies, and engagements will be built in the years ahead.

As President, my administration's vision is fully aligned with this strategic framework. Our work over the next two years will be anchored on **five pillars** drawn directly from the Strategic Document:

### **1. Membership Development (MD):**

Modernising capacity building through training, entrepreneurship, continuous professional development, Secretariat strengthening, and re-engagement of inactive members. This includes global-standard training partnerships and digital platforms for members support.

### **2. Strategic Partnerships (SP):**

Establishing deep collaborations with government, industry, and academia to drive innovation, promote local content, and accelerate the commercialisation of research. Initiatives include intergovernmental round-tables, policy think tanks, and innovation hubs.

### **3. International Relations (IR):**

Expanding Nigeria's global engineering presence through alliances with international federations, diaspora integration, and mechanisms for

professional mobility, ensuring Nigerian engineers compete and thrive globally.

#### **4. Community Impact (CI):**

Leveraging engineering expertise to address societal needs, advance vocational STEAM education, foster youth engagement through JET Clubs and engineering Olympiads amongst higher institutions, expand welfare initiatives, and strengthen ethical standards in engineering.

#### **5. Institutional Branding (IB):**

Enhancing the image of NSE through deliberate branding, structured media engagement, sustenance of the International Standards Organisation (ISO) certification, and endorsement of engineering products and services. This theme aims to position NSE as both a respected voice and a trusted partner in national development.

These pillars will guide our priorities and inspire our actions. From policy advocacy to member welfare, digital transformation to global partnerships, and recognition to research, each initiative we undertake will reflect one or more of these core values. This is how we will reset the NSE—with structure, with vision, and with measurable results.

### **1. RENEWED HOPE NIGERIA FIRST POLICY**

Distinguished guests, colleagues, fellow professionals, ladies and gentlemen, It is both timely and appropriate to begin the formal part of this address by commending the Federal Government, under the visionary leadership of President Bola Ahmed Tinubu, GCFR, for the launch of the **Renewed Hope Nigeria First Policy**. This bold and integrated policy framework signals a national reset, one anchored on local capacity, technical expertise, innovation, and institutional reform.

The Nigerian Society of Engineers fully supports the intent and philosophy behind this policy. We are particularly encouraged by its core message, that Nigeria's development must be led by Nigerians, using Nigerian resources, knowledge, and ingenuity. The technical know-how required to drive progress already exists within our borders, and within our membership lies a wealth of engineering excellence ready to be mobilised.

However, while the direction of the policy is commendable, its success will ultimately depend on implementation, not intention. Past experiences remind

us that well-meaning policies have often faltered due to weak delivery frameworks, inconsistent follow-through, and poor institutional coordination. The Renewed Hope Nigeria First Policy must be shielded from such outcomes through strong legislative backing, clear targets, empowered delivery teams, and public accountability mechanisms.

We commend the National Assembly for initiating the legal architecture to support the policy, and we recognise President Tinubu's personal commitment to ensuring its execution. But leadership must now translate into structured, measurable action that the professional community can support, monitor, and enhance.

In alignment with this national direction, the Nigerian Society of Engineers will initiate a strategic review aimed at identifying concrete opportunities for Nigerian engineers to contribute meaningfully to governance, infrastructure delivery, manufacturing, and policy execution. This effort will guide our engagements with government and ensure that engineering professionals are positioned as key drivers in the realisation of the Renewed Hope Nigeria First Policy.

Going forward, the Nigerian Society of Engineers will deepen its collaboration with government in five strategic areas:

1. Active participation in the drafting and review of engineering-related legislation and executive policies,
2. Identification and support of local engineering firms and suppliers across all sectors,
3. Strengthening and enforcement of procurement systems that prioritise Nigerian-made products and indigenous expertise,
4. Development of a Local Content Compliance Framework with enforceable benchmarks for all publicly funded engineering works, and
5. Technical support for COREN in maintaining a comprehensive register of high-quality Nigerian engineering manufacturers and service providers.

Distinguished ladies and gentlemen, this is more than a policy, it is a professional obligation and a national opportunity. Let us not sit back and observe. Let us rise, contribute, and ensure that **Nigerian solutions, delivered by Nigerian engineers, shape the Nigerian future.**

## 2 CONTINUING PROFESSIONAL DEVELOPMENT

As Nigerian professionals working within a challenging and often unforgiving environment, it is imperative that we reaffirm our commitment to Continuing Professional Development (CPD) as a non-negotiable element of engineering practice. CPD must not be seen as a peripheral activity, it is central to our relevance, resilience, and professional evolution in a globally competitive space.

A core principle of our Code of Ethics underscores this responsibility: ***“Members shall continue their professional development throughout their careers and shall provide opportunities for the professional development of those engineers under their supervision.”***

At the level of the Nigerian Society of Engineers (NSE), I remain deeply concerned about the persistent gap in institutional capacity among our members. This concern is not merely rhetorical, it is a call to deliberate, structured action. Our advancement as a profession depends on a bold, long-term strategy that equips Nigerian engineers with the knowledge, adaptability, and digital literacy to meet future demands.

Accordingly, I underscore the urgent need for a well-structured, dynamic, and responsive CPD framework, one that not only promotes lifelong learning but also incentivises specialisation, rewards innovation, and integrates real-time industry developments into training delivery. This will form the bedrock of our professional renewal strategy.

I would also like to raise a critical concern: how can the NSE effectively support the Council for the Regulation of Engineering in Nigeria (COREN) in its implementation of the Outcome-Based Engineering Education (OBEE) model? We must not just observe the process; we must actively contribute to its success by harmonising post-graduation CPD with OBEE's outcomes.

The OBEE curriculum is aligned with global best practices and is designed to promote continuous improvement in engineering education, bridging the gap between academic theory and professional application. It is therefore essential that engineers:

- Actively participate in conferences, workshops, seminars, and technical lectures;
- Stay current with global developments through curated content, peer-reviewed publications, and applied research;
- Undertake advanced and industry-specific refresher courses from

accredited institutions.

The knowledge and awareness gained from these activities will not only empower our young engineers but also align them with national policy goals like the Renewed Hope Agenda. NSE will create deliberate pathways, through forums, mentoring hubs, and digital CPD platforms, that help our young engineers understand their roles, assess their limitations, and grow with purpose and humility.

In light of these priorities, I hereby reaffirm that under my leadership, the NSE will take concrete institutional steps to mainstream CPD as a standard for excellence. In the weeks ahead, I will establish a Council Advisory Committee on Engineering Capacity Development, to work with COREN and related bodies in implementing scalable, impactful learning models.

Among the proposals under consideration is the adoption of a rule requiring CPD credit accumulation as a precondition for the issuance or renewal of COREN practice licences. This move is intended not as a penalty, but as a professional filter that rewards commitment to excellence. Together, let us commit to a future where Nigerian engineers are not just qualified, but globally competitive, respected, and ready to drive sustainable national transformation.

### **3 TECHNICAL AND VOCATIONAL EDUCATION AND TRAINING (TVET)**

In a related development, the Federal Government's recent announcement on the upgrade and inauguration of 38 technical colleges represents a bold and timely step toward rebuilding Nigeria's skills infrastructure. This initiative, under the broader national education reform agenda, is commendable, not just for its scale, but for its focus on equipping young Nigerians with globally competitive, industry-relevant competencies that meet both local demand and international benchmarks.

The Nigerian Society of Engineers (NSE) has long championed Technical and Vocational Education and Training (TVET) as a critical pathway for addressing the widening skills gap, tackling youth unemployment, and reducing Nigeria's overdependence on foreign technical labour. The initiative is therefore strongly aligned with our mission to build technical capacity at all levels of society.

In support of this national effort, the NSE hereby affirms its readiness to collaborate with the Federal Government to deepen the impact and sustainability of this programme. Already, we have directed our Young

Engineers' Forum across relevant branches, especially those near the new technical colleges, to mobilise and provide curriculum-aligned support services on a pro bono basis. This reflects our enduring commitment to capacity building, grassroots empowerment, and national service.

Going forward, our administration will establish formal engagement channels with the Ministry of Education, the National Board for Technical Education (NBTE), and relevant stakeholders. The objective is to co-create a structured implementation framework that ensures long-term viability, industry linkage, and measurable outcomes, hallmarks of sustainable engineering impact.

#### **4 STRENGTHENING ORGANIZATIONAL ALIGNMENT AND GOVERNMENT ENGAGEMENT**

I am pleased to share with you a key update in our collective efforts to enhance the structure, relevance, and national impact of the Nigerian Society of Engineers. As a large and widely represented organisation with branches across all geopolitical zones of the country and in the diaspora, the NSE is now entering a deliberate phase of strategic realignment. Our branches are being guided to operate in full alignment with the principles and priorities outlined in our Strategic Document. This alignment is essential for promoting unified action, improving governance, and elevating the voice of the engineering profession in all matters of national interest.

Looking ahead, we are set to activate a critical engagement initiative through the appointment of volunteer Desk Officers, drawn from our members already working within key Ministries, Departments, and Agencies (MDAs). These officers will serve not merely as communication liaisons, but as strategic enablers of policy influence and professional integration. They will be responsible for providing timely updates on opportunities, legislative developments, and technical engagements. They will also help ensure that engineering input is embedded in national decision-making processes.

Each Desk Officer will submit quarterly reports to the NSE, which will be evaluated to measure alignment with our policy objectives, facilitate feedback loops, and improve engagement across sectors. This initiative underscores my administration's commitment to building institutional partnerships, enhancing the Society's relevance within public governance, and positioning the NSE as a trusted professional stakeholder in the national development space.

#### **5 FINANCIAL REFORM AND INSTITUTIONAL STRENGTHENING**

In continuation of the successes made on financial prudence and institutional sustainability in recent years, our administration will take proactive steps to reposition the Nigerian Society of Engineers on a path of sound financial health, strategic resource management, and operational resilience.

We will pursue income diversification through legally permissible and professionally aligned means. This includes:

- Establishing structured partnerships with corporate institutions to support technical training, innovation challenges, and engineering-focused capacity-building programmes,
- Exploring non-dues revenue channels such as professional endorsements and value-based service offerings,
- Strengthening internal budgeting discipline with priority given to impact-driven programmes and member services.

As part of this financial reform, we will also propose a review of the annual subscription framework, not to impose arbitrary increases, but to ensure that the financial model is fair, efficient, and responsive to the Society's future needs. Subject to Council approval and aligned with MEMART provisions:

- **Early Annual Subscription Payment Discount:** Members who pay on or before 30th June will receive a 5 percent discount on their annual dues,
- **Loyalty Reward:** Members who pay their dues early for three consecutive years will, in the third year, receive a 10 percent discount, as recognition for consistent commitment to the Society.

These incentives are designed to improve financial forecasting, encourage early compliance, and reinforce a culture of shared responsibility.

## 6 ESTABLISHMENT OF THE NSE PRINTING PRESS

As part of our institutional strengthening strategy, we will prioritise the establishment of an in-house **NSE Printing Press**. This initiative is not commercial in nature but will serve to significantly enhance operational efficiency and reduce long-term outsourcing costs. Specifically, it will:

- Provide timely and cost-effective printing of certificates, journals, event materials, and technical publications,
- Maintain confidentiality and quality control, especially for official and sensitive Society documents,
- Promote branding consistency across all official NSE communications,

- Support internal training programmes and Continuing Professional Development (CPD) with readily available printed resources.

The printing press will be professionally managed and aligned with best practices, offering a dependable production backbone for our expanding activities. Its establishment will contribute to cost savings, strengthen institutional identity, and further demonstrate our commitment to long-term operational excellence.

## 7 NATIONAL PLANNING AND BUDGETING

The role of engineers in national development must extend beyond project execution to include active participation in planning, prioritisation, and fiscal decision-making. Engineering is not just about designing structures, it is also about applying logic, structure, and evidence-based thinking to complex systems, including governance and budgeting.

In recognition of this, our administration will ensure that the Nigerian Society of Engineers becomes a key contributor to national planning and budgeting frameworks, especially in matters relating to infrastructure, innovation, and technology-driven development.

As a major step toward institutionalising this role, we will establish the **NSE National Budget Review Committee**. This Committee will be tasked with critically evaluating annual budget proposals and providing technical insights to align national funding priorities with engineering and infrastructure needs.

This effort is not intended as criticism of existing government processes, but as a contribution to national progress. Engineers must provide structured, professional perspectives that can improve the efficiency, impact, and long-term sustainability of public investments.

Through this initiative, the Nigerian Society of Engineers will deepen its relevance in shaping national policy, and ensure that engineering expertise contributes meaningfully to decisions that affect infrastructure, livelihoods, and economic development.

## 8 MEMBERSHIP VALUE AND BENEFITS SYSTEM

A thriving professional body must offer its members more than symbolic

affiliation; it must provide tangible value that supports their career journey, elevates their professional identity, and recognises their loyalty. Under my leadership, the Nigerian Society of Engineers will prioritise this core responsibility through a redesigned and digitally accessible Membership Value and Benefits System.

We are introducing a comprehensive, member-focused platform that delivers real-time access to professional resources, tools, and privileges. Financially up-to-date members will enjoy these benefits through their NSE portal, including:

- Discounted flights, hotel bookings, and car rentals for professional or personal use,
- Access to NSE library, premium engineering software, technical tools, and research materials,
- Subsidised training opportunities, including CPD courses, webinars, and workshops,
- Special rates on engineering books, digital publications, and resource kits,
- Exclusive entry to NSE Members' Lounges at designated branches and the national secretariat, offering a space for networking, collaboration, and professional reflection,

In addition, members in good standing will receive a "Good Standing" digital badge on their profiles. This visible credential will signify professionalism, compliance, and active engagement in the engineering community.

As part of this value-driven approach, a Job Desk will be created at the NSE Secretariat to support members' professional growth through partnerships that provide access to job opportunities, internships, and career placements. It will also offer CV review support and coordinate periodic career development sessions. This desk will serve as a practical step in helping members transition from qualification to opportunity.

This new benefits system is designed not only to improve member satisfaction but to reflect the prestige and relevance of NSE membership in today's evolving professional environment. It is a key element of our broader effort to reset the NSE, making membership both a symbol of excellence and a platform for continuous growth and opportunity.

## 9. REVIEW AND RESTRUCTURING OF NSE PROFESSIONAL INSTITUTIONS

Distinguished members, ladies and gentlemen, the Professional Divisions of the Nigerian Society of Engineers were originally established in 1984 to provide platforms for collaboration, knowledge sharing, and advancement within distinct areas of engineering practice. Recognising the need for deeper professional focus, these Divisions were later transformed into Professional Institutions, each expected to drive thought leadership, capacity development, and sector-specific contributions.

Today, the NSE has 25 such Institutions, each representing a specialised field. However, over time, there has been growing overlap in their activities, reduced engagement, and an increasing administrative burden on the Society's structure. Some Institutions have become dormant, while others operate without clear distinction or strategic relevance. This trend calls for reflection, restructuring, and revitalisation.

To address these concerns, I will present a memorandum to Council proposing a comprehensive review and restructuring of all NSE Professional Institutions. This exercise will assess their performance, membership engagement, financial sustainability, and alignment with our Strategic Document. Based on these findings, we will propose:

- The consolidation of overlapping or underperforming Institutions,
- The realignment of mandates to reflect emerging fields and national priorities,
- And where necessary, the suspension or reintegration of institutions that no longer serve a strategic purpose.

Let me be clear: this is not a punitive exercise. It is a forward-looking reform designed to strengthen the role of Professional Institutions as engines of innovation, research, policy advocacy, and specialised technical development within the NSE.

Our goal is to move from fragmentation to focus, from formality to impact. We will work closely with stakeholders, including past and present leaders of the Institutions, to ensure that this process is inclusive, respectful, and purposeful.

When completed, this restructuring will deliver a leaner, more responsive, and future-ready system of Professional Institutions, better equipped to support engineers, shape industry standards, and contribute to national development.

## 10 OPERATIONAL REFORMS AT THE NSE SECRETARIAT

As I draw this inaugural address to a close, I find it necessary to share a critical part of our transformation agenda, the operational revitalisation of the NSE Secretariat. These proposed reforms represent not only campaign commitments, but the foundations upon which we must build a responsive, efficient, and forward-looking professional institution.

At the core of this vision is the urgent need to enhance the Secretariat's efficiency, service delivery, and responsiveness to members. We must move from manual bottlenecks to streamlined digital processes, from fragmented administration to coordinated professionalism.

To this end, I am pleased to outline the following key reforms which will guide our operational transformation:

- **Prompt Handling of Correspondence:** Official communication, including emails and physical mails, must be handled with urgency and professionalism. A responsive Secretariat is the face of a serious institution.
- **Digitalisation of NSE Secretariat Operations:** To ensure efficiency, transparency, and responsiveness in service delivery, our administration will prioritise the full digitalisation of operations at the NSE National Secretariat. This transformation will modernise how the Society functions internally and interacts with its members.
  - Key focus areas will include:
    - Digitisation of administrative workflows, including correspondences, approvals, and document management,
    - Secure digital archiving of records, allowing for fast retrieval and improved accountability,
    - Deployment of internal communication platforms, to enhance coordination between departments and with branches,
    - Real-time service dashboards and feedback channels, for monitoring efficiency and responsiveness.

This digital transformation will not only enhance the Secretariat's operational capacity, but also align the Society with global best practices in professional administration.

- **Membership Database Cleaning and Update:** As part of the Secretariat

reforms, we will undertake a systematic update and cleaning of the NSE membership database to ensure accuracy, reliability, and ease of access. This will support better service delivery, improve communication with members, and enable the Society to plan more effectively around membership demographics, participation, and professional development needs.

An up-to-date database is not just an administrative tool, it is a critical asset for engagement, transparency, and operational efficiency.

- Confidential Member Feedback Mechanism: To promote a more responsive and inclusive Society, we will establish a confidential feedback system through which members can submit suggestions, observations, and grievances without fear or hesitation. This system will be available both online and physically at the Secretariat.

Feedback received will be regularly reviewed and analysed to inform decision-making, improve service delivery, and strengthen member relations. It will also serve as an early warning system for identifying emerging concerns, helping the leadership stay connected to the real experiences and expectations of members across all branches.

This mechanism reinforces our commitment to accountability, transparency, and continuous improvement in the way the NSE is managed and governed.

- **Establishment of NSE Source:** We are introducing **NSE Source**, a digital news and information hub dedicated to Nigerian engineers. This platform will serve as a timely, insightful, and accessible source of professional content, delivering expert perspectives, institutional updates, and industry intelligence in a concise format.

Unlike The Nigerian Engineer, which is our formal quarterly publication, NSE Source will be published on a biweekly basis, offering:

- Curated industry news, policy developments, and regulatory updates,
- Expert opinions and thought pieces from Nigerian and global engineering leaders,
- Society news, highlighting key decisions, programmes, and upcoming events,
- Video features on major NSE activities, project site visits, or

- member achievements,
- o Quick updates on fellowships, grants, awards, competitions, and training opportunities.

Accessible through email, the NSE website, and mobile platforms, **NSE Source** will serve as the engineer's first stop for professional awareness, society engagement, and sectoral developments. It will be dynamic, engaging, and tailored to the realities of the modern Nigerian engineer, helping members stay informed, connected, and inspired.

This is a core part of our strategy to **reset the NSE**, by making the Society more visible, more responsive, and more relevant in a fast-changing professional environment.

- **Revamp of the NSE Newsletter:** We will revitalise The Nigerian Engineer as the Society's flagship quarterly newsletter, under the stewardship of a professional editorial team. The publication will feature peer-quality articles, technical commentaries, member-authored insights, and sectoral reviews that reflect the depth and diversity of engineering practice in Nigeria.

The redesigned newsletter will serve not only as an institutional mouthpiece but as a platform for thought leadership, scholarly exchange, and policy advocacy. It will provide space for engineers across disciplines to publish, reflect, and engage on topics shaping the profession and the nation.

Through The Nigerian Engineer, we will reinforce a culture of professional excellence, intellectual contribution, and cross-disciplinary learning, essential components in the ongoing effort to reset the NSE and reclaim our voice in national development.

- **Reactivation and Enhancement of the NSE Technical Journal:** We will reposition the **NSE Technical Journal** as a leading, peer-reviewed engineering publication that meets international scholarly standards. The goal is to transform it into a credible platform for publishing high-quality research, professional practice papers, and technical innovations relevant to Nigeria and the global engineering community.

To achieve this, we will:

- Adopt a rigorous **peer-review process** with clear editorial and ethical

standards,

- Establish a diverse editorial board comprising academics, practitioners, and regulators,
- Pursue **indexing in recognised academic databases**, such as Google Scholar and Scopus, to enhance citation visibility,
- Encourage cross-sector submissions from universities, polytechnics, research institutions, and industry professionals,
- Align journal themes with national priorities, such as infrastructure, energy, climate resilience, and digital engineering.

We will also create opportunities for young engineers and postgraduate students to contribute, promoting research culture and strengthening the bridge between academia and practice.

Through this transformation, the **NSE Technical Journal** will not only serve as a publication outlet but as a tool for policy influence, knowledge advancement, and professional recognition, further positioning the Society as a thought leader in engineering development.

These reforms will be driven by service-focused staff, guided by policies, and measured by performance indicators. The Secretariat must not only function, it must inspire confidence, enable excellence, and deliver value to every member. I will work closely with the Executive Secretary, Council, and the appropriate committees to ensure that these initiatives are not only adopted, but fully implemented. Together, we will reposition the NSE Secretariat as a model of modern institutional excellence, efficient, transparent, and worthy of the profession it represents

## 11. NATIONAL ASSEMBLY LIAISON OFFICER

To ensure consistent legislative engagement and policy influence, our administration will appoint a dedicated National Assembly Liaison Officer. This officer will serve as the Society's official link to the National Assembly, working closely with relevant committees and lawmakers to advocate for policies and laws that support engineering development and national infrastructure goals.

The liaison officer will monitor legislative activities, provide technical briefs to legislators on engineering-related bills, and ensure that the voice of the profession is heard during public hearings, oversight functions, and policy reviews.

This role will strengthen the NSE's presence within the policymaking ecosystem, and position the engineering profession as a trusted technical resource in shaping Nigeria's development agenda.

## 12. NSE CONFERENCE REFORM

To improve the quality, inclusiveness, and impact of NSE conferences, our administration will implement a series of reforms that reflect global best practices and our commitment to sustainability, innovation, and member experience.

**Paperless Conference Initiative:** Starting with the next Engineering Assembly, we will transition to a paperless conference model, where all event materials including programmes, presentations, and reports will be provided digitally. This will reduce printing costs, minimise environmental waste, and improve access to information before, during, and after the conference.

**Dedicated Conference App:** We will deploy an NSE Conference App as a standard feature for all major national events. This digital platform will provide real-time access to:

- Event schedules, session listings, and programme updates,
- Speaker profiles and topic summaries,
- Interactive tools for networking, Q&A, and feedback,
- Notifications, resource downloads, and on-site navigation support.

The app will significantly enhance the delegate experience and promote a more interactive and data-driven approach to conference engagement.

**Optional Registration Model:** To improve flexibility and affordability, we will introduce an optional registration structure. Delegates will be able to customise their conference participation by selecting specific sessions, technical tracks, workshops, and social events, based on interest and relevance. This model will allow members to get the most value from their registration and support broader inclusion.

**Post-Conference Implementation Committee:** To ensure follow-through on recommendations and communiqués issued at NSE conferences, a Post-Conference Implementation Committee will be established as a permanent structure. The committee will track implementation across all NSE levels, engage responsible units, and provide quarterly progress reports, including a

full update to be presented at the next Annual General Meeting.

**Engineering MDA Sessions:** To strengthen engagement between the Nigerian Society of Engineers and key institutions driving national infrastructure and development, we will introduce **dedicated sessions at NSE conferences** featuring engineering-related Ministries, Departments, and Agencies (MDAs).

These sessions will provide a structured platform for MDAs to present updates on policies, ongoing projects, regulatory reforms, and upcoming opportunities that impact the engineering profession.

The objectives of this initiative are to:

- Keep members informed of government engineering initiatives and programmes,
- Enhance transparency and sector alignment through direct interaction with MDAs,
- Encourage professional feedback and collaborative problem-solving,
- Deepen the NSE's institutional relevance as a strategic partner in national development.

This conference segment will be a regular feature of our technical and annual gatherings, fostering real-time dialogue, improving policy understanding, and bridging the gap between government agencies and the engineering community.

### **13. WOMEN IN ENGINEERING PROGRAMMES**

The advancement of women in engineering remains a strategic priority in building an inclusive and forward-looking profession. Our administration will support the Association of Professional Women Engineers of Nigeria (APWEN), to promote leadership, mentorship, and visibility for female engineers across all sectors.

This initiative will support:

- Targeted leadership and mentorship programmes that prepare women engineers for executive and technical leadership roles,
- Expanded outreach to secondary schools and communities, encouraging young girls to pursue careers in science, technology, engineering, and mathematics,

- Capacity-building workshops and professional clinics, focusing on technical upskilling, business development, and sector-specific excellence,
- Recognition and documentation of impact, highlighting the role and achievements of women engineers at branch, national, and global levels,
- Increased representation of women in NSE committees and governance structures, reinforcing inclusive decision-making.

We will also encourage greater collaboration between APWEN and other divisions of the NSE to mainstream gender inclusion across all programmes and professional activities.

By empowering our women engineers, we are not only honouring their contributions, we are also investing in a stronger, more balanced future for the profession.

#### **14. EMPOWERING THE YOUNG ENGINEERS FORUM OF NIGERIA (YEFoN)**

Young engineers are the bridge to the future of our profession, and our approach must reflect more than token support. Under this administration, we will reposition the Young Engineers Forum of Nigeria (YEFoN) as a dynamic platform for creativity, leadership grooming, and professional advancement.

To achieve this, we will establish a Young Engineers Development Framework coordinated through YEFoN at national and branch levels. This framework will include:

- **Annual Infrastructure Photo Contest**, empowering young engineers to capture engineering challenges and innovations across Nigeria, using visual storytelling as a tool for awareness and influence.
- **National Engineering Hackathons** focused on practical solutions to national problems, encouraging interdisciplinary collaboration and problem-solving skills.
- **Innovation Expos and Idea Showcases**, providing young engineers with platforms to present inventions, academic research, and scalable solutions before stakeholders, investors, and regulators.
- **Technical Mentoring Clinics** across branches, pairing young professionals with experienced engineers to build competence in ethics, specialisation, project execution, and entrepreneurship.
- **Leadership Bootcamps**, designed to equip young engineers with essential soft skills—such as communication, teamwork, digital skills, and

strategic thinking—to prepare them for higher responsibilities in the profession.

- **Strategic collaborations with NYSC and tertiary institutions**, to deepen NSE's presence at the grassroots level and onboard emerging talent through guided mentorship, awareness programmes, and student-led initiatives.
- **A Digital Career Resource Hub**, providing YEFoN members with professionally selected job opportunities, CV-building tools, internship placements, and access to both local and international scholarships.

These programmes will be mainstreamed under YEFoN's operational calendar and supported by the national Secretariat. Our goal is not to merely support youth activity, but to build a strong, well-guided pipeline of next-generation engineers who will carry the NSE into the future with skill, character, and vision.

In resetting the NSE, we must empower YEFoN not just as a forum, but as a leadership nursery, innovation driver, and national voice for the emerging engineer.

## 15. FELLOWSHIP REFORM AND PROFESSIONAL ELEVATION

Fellowship in the Nigerian Society of Engineers represents the highest professional recognition within our Society. It is a distinction that must be earned through demonstrable contributions, commitment to the profession, and adherence to the highest standards of ethics and service.

Our administration will undertake a **comprehensive reform of the NSE Fellowship process** to restore its prestige, ensure transparency, and align it with global best practices in similar professional bodies. The objective is to elevate Fellowship as a standard of excellence, not just a title, and to reaffirm its place as the pinnacle of engineering achievement in Nigeria.

Only those who have significantly advanced the engineering profession, contributed meaningfully to the growth of the Society, and demonstrated excellence in leadership and technical competence will earn the right to be called Fellows of the NSE.

This reform is not intended to exclude but to uphold integrity, motivate excellence, and preserve the honour associated with Fellowship. It is time to take Fellowship seriously, to protect its value, and to ensure that it continues to

inspire future generations of engineers.

## 16. RESEARCH GRANTS SCHEME

In our commitment to fostering innovation, academic excellence, and indigenous knowledge development, our administration will introduce a structured Nigerian Society of Engineers Research Grant Scheme to support postgraduate research among Nigerian engineers. This initiative will serve as a critical link between academia, industry, and national development, ensuring that engineering research contributes to real-world solutions.

The grants will be awarded annually through a transparent and competitive process, with one recipient selected from each of Nigeria's six geopolitical zones for each academic level. This ensures equity, national representation, and a diversity of perspectives. Priority will be given to research topics that address infrastructure challenges, emerging technologies, climate resilience, sustainable engineering, and innovation-based development.

The scheme will support:

- Six PhD candidates, each receiving ₦1,000,000,
- Six Master of Engineering candidates, each receiving ₦500,000,
- Six Bachelor of Engineering students, each receiving ₦200,000.

Applicants will be required to submit a clearly defined research proposal, academic endorsements, and a statement on how their research aligns with national engineering priorities. Disbursement of funds will be tied to specific milestones and monitored by a dedicated NSE Research and Innovation Committee.

This initiative is more than financial support. It is a strategic investment in the intellectual capacity and problem-solving potential of Nigerian engineers. By supporting research across all regions of the country, we will develop solutions that are contextually relevant, nationally inclusive, and globally competitive.

In the long term, we will engage development partners, corporate stakeholders, and funding institutions to scale and sustain the programme, while upholding its integrity, merit-based selection, and regional equity.

## 17 NATIONAL SCIENCE AND ENGINEERING COMPETITION FOR SECONDARY SCHOOLS

As part of our long-term vision to build a robust pipeline of future engineers and innovators, the Nigerian Society of Engineers will introduce a **National Science and Engineering Competition** for secondary schools across the six geopolitical zones of the country.

This annual competition will be designed not only as a test of knowledge, but as a dynamic platform to stimulate interest in science, technology, engineering, and mathematics among young Nigerians. It will serve to identify, encourage, and reward exceptional students with natural aptitude in problem-solving, innovation, and applied science.

The competition will feature:

- A structured multi-stage process beginning with zonal qualifiers and culminating in a national final,
- Problem-solving challenges, project presentations, and innovation showcases rooted in real-world applications,
- Evaluation by a panel of engineers, educators, and technologists to ensure quality, fairness, and academic integrity,
- Cash prizes, medals, and educational materials for top-performing schools and students,
- Full or partial scholarships awarded to outstanding finalists, supported through partnerships with sponsors, foundations, and tertiary institutions.

Special recognition will be given to schools from underserved areas, and participation will be expanded to both public and private institutions. Emphasis will also be placed on inclusivity, with categories encouraging the participation of girls in STEM fields.

This initiative will be championed by the Young Engineers Forum of Nigeria (YEFoN) in partnership with the Ministry of Education, Ministry Science and Technology agencies, and corporate STEM advocates.

Through this competition, the NSE will not only promote academic excellence, but also ignite a passion for engineering at an early age, strengthen national unity through intellectual exchange, and nurture the next generation of Nigerian engineers.

## 18. ANNUAL INNOVATION FAIR

As part of our commitment to promote creativity, engineering entrepreneurship, and homegrown solutions, the Nigerian Society of Engineers will **launch** an Annual Innovation Fair. This event will bring together Nigerian engineers, researchers, inventors, and startups to showcase transformative ideas, technologies, and research outcomes.

The fair will serve as a national platform to:

- Display engineering innovations, prototypes, and market-ready technologies,
- Connect innovators with investors, policymakers, and industry leaders,
- Promote the commercialisation of research outputs and indigenous technologies,
- Recognise outstanding innovations through awards and technical support.

The event will feature keynote sessions, panel discussions, and interactive showcases. It will rotate across geopolitical zones to ensure broader visibility and inclusion. Through this fair, the NSE will strengthen its role in driving innovation and elevating the contributions of engineers to national development.

## 19. NATIONAL CONSTRUCTION EXHIBITION

To reinforce Nigeria's capacity to build with competence, confidence, and local content, the Nigerian Society of Engineers will **establish** a National Construction Exhibition as an annual flagship event.

This exhibition will bring together construction firms, engineering consultants, material suppliers, equipment manufacturers, and startups to:

- Showcase projects, materials, tools, and technologies shaping the built environment,
- Encourage collaboration across sectors and stimulate local content adoption,
- Provide learning and networking opportunities for professionals and students,
- Facilitate technical dialogue on quality assurance, sustainability, innovation, and project delivery.

The event will include technical sessions, exhibitions, and stakeholder forums

aimed at improving standards, recognising excellence, and strengthening Nigeria's construction ecosystem. The exhibition will serve as a powerful platform to promote visibility, collaboration, and innovation within the engineering and construction sectors.

## 20. NSE ENGINEERING EDUCATION FAIR

To further position the Nigerian Society of Engineers as a bridge between local talent and global academic excellence, we will organise an annual NSE Engineering Education Fair that connects aspiring engineers with leading engineering institutions across Nigeria and around the world.

This initiative will serve as a national platform where prospective students, parents, and educators can interact directly with representatives from universities, polytechnics, professional institutes, and scholarship bodies. It will provide accurate, accessible information on:

- Admissions requirements and programme offerings,
- Research and postgraduate opportunities in engineering and related disciplines,
- Scholarships, fellowships, and financial aid options,
- Emerging fields in global engineering education, including digital, environmental, and systems engineering.

In addition to exhibitions and institutional booths, the fair will feature guidance sessions on international credentialing, visa preparation, standardised testing, and career pathways for engineers in both local and international contexts.

Special focus will also be given to promoting access for students from underrepresented regions, and inspiring more young women to pursue engineering education.

The NSE Engineering Education Fair will be held annually and will rotate across zones to ensure broader inclusion and national reach. Through this initiative, the NSE will actively promote engineering literacy, global academic access, and the future of technical human capital development in Nigeria.

## 21. FELLOWS' LOUNGE

In furtherance of our commitment to uphold the dignity and status of Fellowship within the Nigerian Society of Engineers, our administration will

establish a **dedicated Fellows' Lounge** at the NSE National Headquarters. This initiative is designed to enhance the comfort, recognition, and engagement of our most senior members.

The lounge will be accessible **exclusively to financially up-to-date Fellows**, and will offer a serene, well-furnished space within the Secretariat, tailored to the needs and expectations of our most accomplished professionals. It will be staffed by a courteous, well-trained officer responsible for attending promptly to Fellows' enquiries and providing high-level support.

To ensure comfort and convenience, the lounge will include amenities such as **a mini tea and refreshment corner**, private seating areas, and resource materials for reading and professional engagement.

During national events hosted by the NSE, including the Annual General Meeting and Engineering Assembly, a **mobile Fellows' section** will be provided at the event venue, offering hospitality, protocol assistance, and an environment for networking and strategic dialogue among Fellows.

This initiative is not only a mark of respect, but also a structural commitment to elevate the visibility, comfort, and continued participation of our Fellows in the affairs of the Society. It reinforces our belief that those who have contributed significantly to the growth of our profession should enjoy the privileges of excellence and seniority.

## 22. ACKNOWLEDGEMENT

All praise and adoration are due to the Almighty Allah, Lord of the World, the Beneficent and the Most Merciful for granting me the grace to witness this remarkable day. This journey has been demanding and transformative, yet His boundless mercy, protection, and guidance have sustained me every step of the way.

My deepest gratitude goes to my late father, Alhaji A. Rabiu, whose unwavering dedication to hard work, discipline, and reverence for God shaped the man I am today. His life of integrity and service remains a shining example that continues to inspire me.

I also honour his dear friend and my guardian, Alhaji Isah Mustapha Agwai I, CFR, the late Emir of Lafia and Chairman of the Nasarawa State Council of Chiefs. He was more than a mentor, he was a pillar of strength, wisdom, and

generosity.

Equally, I pay special tribute to His Excellency, Alhaji Aliyu Akwe-Doma, the late former Governor of Nasarawa State, who played a defining role in my life. He was both a mentor and a father figure, guiding me with his wisdom, supporting me with his counsel, and encouraging me to reach greater heights. His belief in me helped shape the trajectory of my professional and personal journey.

I must also acknowledge Engr. Ibrahim Khaleel Inuwa, FNSE, OFR, past President of the Nigerian Society of Engineers and past President of COREN. He was a mentor whose influence extended beyond my engineering career to my political journey within the engineering profession. His wisdom, encouragement, and example played a pivotal role in shaping my path in professional leadership. Though he is no longer with us, his legacy of excellence, discipline, and service remains a beacon for all who aspire to build and lead with integrity.

Though they are no longer physically present, I remain comforted by the belief that their spirits stand with me today. Their legacy reminds me daily of the value of humility, resilience, and a life lived in service to others. May Allah forgive their shortcomings and reward them with eternal rest in Al-Jannatul Firdaus. Aamin.

To Your Excellencies, Your Royal Highnesses, Distinguished Guests, Colleagues, and Fellow Professionals, I express my heartfelt appreciation for your presence here today. I am deeply grateful for your support and goodwill.

A special note of gratitude to His Excellency, Engr. Abdullahi Sule, FNSE, CON, Executive Governor of Nasarawa State. Your presence today, despite your demanding schedule, is a profound honour. Thank you for your unwavering support and exemplary leadership.

To His Royal Highness, Hon. Justice Sidi Bage Muhammad I (JSC, Rtd), CFR, Emir of Lafia and Chairman of the Nasarawa State Council of Chiefs, I am sincerely thankful for your gracious presence and for leading other esteemed traditional rulers to this event. Your support has added immense honour to this occasion.

I extend appreciation to all our distinguished guests, who made the time to be here. Your presence is a gift I do not take for granted. The value of your time and your support is deeply cherished.

To the members of my campaign team and the Inauguration Steering

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

Committee, I am eternally grateful. Your hard work, loyalty, and commitment were truly extraordinary. Words alone cannot convey my appreciation for your sacrifices and dedication. May God reward your labour of love and grant you continued favour in all your endeavours.

While I would have loved to mention everyone by name, the sheer number of deserving individuals makes it impossible within the limits of this occasion. Please know that your contributions have not gone unnoticed. I carry your goodwill with me, and I remain humbled by your belief in this cause.

## 23 CONCLUSION

Distinguished colleagues, friends, and honoured guests,

Today marks not just the beginning of a new leadership, but the unveiling of a new resolve, a reset of our purpose, priorities, and professional practice. The journey ahead is not without its challenges, but we do not face them with fear. We face them with focus, with strategy, and with unity.

The mandate you have entrusted to me is clear, to lead with integrity, to restore institutional relevance, and to reposition the Nigerian Society of Engineers as a beacon of excellence, both nationally and globally.

Let it be known that I did not take the oath of office to manage decline or preserve the ordinary. I did so to inspire reform, to rebuild trust, and to ignite a new era of excellence in engineering leadership. We will do this together, with courage, with consistency, and with the collective wisdom of our members.

Let us leave here today with a renewed spirit, ready to contribute, to innovate, and to elevate the Nigerian engineering profession. Let us build not only roads and bridges, but also systems, values, and institutions that stand the test of time.

Together, we shall engineer a stronger Society, a smarter future, and a greater nation. **THE TIME IS NOW.**

Thank you, and may the Almighty continue to guide us all.

**Engr. Ali A. Rabiu, FNSE, FAEEng, F.ASCE, MFR**

## GOVERNMENT OF NASARAWA STATE

### Goodwill Message

I, Engr. Abdullahi A. Sule, CON, FNSE, FNMGS, FNIPR, Executive Governor of Nasarawa State heartily felicitate with **Engr. Ali Alimasuya Rabiu, FNSE, FAEng, MFR (Cigarin Lafia)** on your election and investiture as the 35th President of the Nigerian Society of Engineers.

I wish to state that your emergence as the 35th President of our noble profession is an eloquent testimony of your antecedents as an astute Engineer of global repute. I must mention that over the years, you have continued to exhibit good conduct and purposeful leadership, which endeared you to me and many of the professionals. This has no doubt translated into your election as the President of the Council for the Regulation of Engineering in Nigeria (COREN), as well as the 34th Deputy President of the Nigerian Society of Engineers (NSE).

As a son of Nasarawa State, you have also contributed to the progress and development of our dear State not only in Engineering profession, but in all capacities which the State has entrusted you in the recent past. This elevation, therefore, is a call to more service and we are optimistic that you will justify the confidence reposed in you by the people of this noble profession.

While congratulating you for this landmark achievement, I pray that God Almighty will give you the wisdom to pilot this herculean task in the best interest of Engineering profession and socio-economic development of Nigeria.

Signed:

**Engr. Abdullahi A. Sule,**

The President, Nigerian Society of Engineers (NSE)  
NSE Headquarters, National Engineering Centre  
Central Business District  
Abuja, Nigeria

Mr. President,

**CONGRATULATORY MESSAGE**

I warmly congratulate you on your well-deserved investiture as the 35th President of the Nigerian Society of Engineers (NSE).

Your investiture marks the culmination of a distinguished professional journey defined by excellence, service, and visionary leadership. Over the years, you have consistently demonstrated depth of technical competence, clarity of purpose, and a strong commitment to the growth of the engineering profession in Nigeria and beyond. This milestone is a fitting recognition of the confidence the engineering community has in your leadership and character.

Your professional journey has been shaped by meaningful contributions to engineering practice, professional development, policy advocacy, and institutional strengthening. Through your work and leadership, you have inspired confidence, mentored younger engineers, and helped position the Nigerian Society of Engineers for greater relevance and global engagement.

As you assume the office of President, I am confident that your experience, wisdom, and strategic insight will further strengthen unity within the Society, elevate professional standards, and deepen the contribution of engineers to national development.

On behalf of myself and the Ministry of Works and Infrastructure, Enugu State, I wish you a successful, impactful, and fulfilling tenure as President of our great Society.

Congratulations once again, Mr President.

**Engr. Ben Osy Okoh, FNSE, F.ASCE**  
Commissioner for Works and Infrastructure

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

**COREN**

COUNCIL FOR THE REGULATION OF ENGINEERING IN NIGERIA  
NO. 22 ADDIS ABABA CRESCENT, WUSE ZONE 4, ABUJA

## CONGRATULATORY MESSAGE

On behalf of the Council for the Regulation of Engineering in Nigeria (COREN), I heartily congratulate you, Engr. Ali Alimasuya Rabiu, FNSE, FAEng, MFR (Cigarin Lafia) on your investiture as the 35th President/Chairman-in-Council of the Nigerian Society of Engineers (NSE).

This investiture represents a defining moment in the leadership journey of the Nigerian engineering profession. It underscores continuity of vision, strength of institutions, and the shared commitment of stakeholders to professionalism, innovation, and national development.

Your emergence as President of the NSE is particularly significant, given your distinguished service as the immediate past president of COREN, where you demonstrated exemplary leadership, strategic clarity, and an unwavering resolve to strengthen professional regulation, compliance, and ethical standards in engineering practice. Your depth of experience in regulation and professional advocacy uniquely positions you to further elevate the role and relevance of the NSE in shaping the future of engineering in Nigeria.

The Council is confident that under your leadership, the NSE will continue to provide purposeful direction, foster unity across engineering cadres, promote capacity development, and advance quality engineering services in alignment with global best practices.

COREN looks forward to sustained collaboration with the NSE under this new leadership in driving reforms, strengthening institutional synergy, and deepening the contribution of engineering to national growth and sustainable development.

Once again, congratulations on this well-deserved investiture. We wish you a successful, impactful, and legacy-driven tenure as President/Chairman-in-Council of the Nigerian Society of Engineers.

### GOODWILL MESSAGE FROM HIS ROYAL HIGHNESS HON. JUSTICE SIDI BAGE MUHAMMAD I, RTD, CFR, EMIR OF LAFIA BARE-BARI AND CHAIRMAN, NASARAWA STATE COUNCIL OF CHIEFS.

The Nigerian Society of Engineers has made the right decision in choosing Engr. Ali Alimasuya Rabiu, FNSE (The Chigari of Lafia Bare-Bari) as the 35th President of the Nigerian Society of Engineers.

The Lafia Emirate Council identifies with the enormous contributions of Engr. Ali Rabiu towards the success and upliftment of the Nigerian Society of Engineers and the Engineering Profession beyond any measure.

His dedication and integrity when it comes to execution of projects that he is involved, remains indelible in our minds.

On behalf of the Lafia Emirate council and the entire people of Lafia, we wish to congratulate and felicitate with our son on his Investiture ceremony as the 35th President of this Prestigious society.

We wish him success, God guidance and protection as he assumes this exalted office.

Thank you.

**GOODWILL MESSAGE ON THE INVESTITURE OF  
ENGR. ALI ALIMASUYA RABIU, FNSE, FAEng**

**AS THE 35TH PRESIDENT OF THE NIGERIAN SOCIETY OF ENGINEERS**

I extend my warm congratulations to Engr. Ali Alimasuya Rabiu, FNSE, FAEng, on his investiture as the 35th President of the Nigerian Society of Engineers (NSE). This significant milestone is a celebration of an outstanding professional journey defined by excellence, discipline, and devoted service to the engineering profession and national development.

Engr. Rabiu's career exemplifies the highest ideals of engineering practice, technical depth, ethical leadership, institutional loyalty, and a strong commitment to mentorship and capacity development. His emergence as President of the NSE reflects the confidence reposed in his experience, character, and vision by his peers across the country.

At a time when Nigeria is in urgent need of sustainable infrastructure, innovation-driven growth, and technically sound policy execution, the leadership of the Nigerian Society of Engineers remains critical. I am confident that under Engr. Rabiu's stewardship, the Society will further strengthen its relevance as a professional authority, a development partner, and a voice of reason in national discourse.

As he assumes this noble responsibility, I wish him wisdom, strength, and success in guiding the affairs of the NSE. May his tenure be marked by unity within the profession, strategic engagement with government and industry, and lasting contributions to Nigeria's engineering landscape.

Please accept my sincere goodwill and best wishes for a most impactful tenure.

### *Goodwill Message*

I wish to, on behalf of the Government and good people of Nasarawa State congratulate **Engr. Ali Alimasuya Rabiu, FNSE, FAEng, MFR (Cigarin Lafia)** on your emergence and investiture as the 35th President of the Nigerian Society of Engineers.

Your election as the President of this noble profession is no doubt, a testament of your outstanding contribution to the development of engineering profession in the country and a recognition of your global wealth of experience in the industrial development of Nigeria. This experience, no doubt, was brought to bear during your stewardship as the President of the Council for the Regulation of Engineering in Nigeria (COREN) and as the 34th Deputy President of the Nigerian Society of Engineers (NSE). Your election therefore is a transition and continuity of purposeful leadership which you are known for.

For us in Nasarawa State, we are not surprise with this well-deserved elevation considering that over the years, you have continued to make Nasarawa State proud with your amazing professionalism and intellectual acumen informed by exemplary conduct in all your endeavours.

While we continue to pray for more advancement, we beseech that God Almighty will guard and guide you in the task of discharging this onerous responsibility to our great country Nigeria.

I wish you a successful and impactful tenure .

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

**Goodwill and Congratulatory Message  
From the Ghana Institution of Engineering (GhIE)  
On the Investiture of  
Engr. Ali Alimasuya Rabiu, FNSE, FAEEng, MFR (CIGARIN LAFIA)  
As the 35th President of the Nigerian Society of Engineers (NSE)**

Today, we gather not just to mark a transition in leadership, but to celebrate a promise, the promise of what is possible when service, excellence, and purpose come together.

On behalf of the Council and Members of the Ghana Institution of Engineering, I bring our warmest congratulations to our brother, **Engr. Ali Alimasuya Rabiu**, on his investiture as the **35th President of the Nigerian Society of Engineers**. This is a proud moment for Nigeria, for Ghana, and for the entire engineering community across Africa.

The friendship between our two nations is older than our borders and stronger than any difference. It was shaped by history, refined by shared struggle, and sustained by a common belief that Africa's future must be built by Africans, with African skill, African integrity, and African imagination. That belief lives on today through the partnership between GhIE and NSE, and through our shared commitment within WAFEO, FAE, and WFEO. And now, that commitment finds new voice in your leadership. Because this moment is not only about a title. It is about a calling. It is about engineers stepping forward not only as builders of bridges and systems, but as builders of nations; not only as problem-solvers, but as path-makers for generations yet unborn. We know this: the future will not wait. It will be shaped by the decisions we make today, the standards we set today, the courage we show today.

Engineers must be at the table in government, in industry, in education, in innovation, helping our societies move from where we are to where we must be. We must train young engineers not just to be competent, but to be curious; not just to be skilled, but to be ethical; not just to succeed, but to serve. And above all, we must insist that how we build matters as much as what we build. Integrity must be our foundation, accountability our compass, and the public good our purpose. As we engineer our future, we must do it well and do it right.

Engr. Rabiu, as you take up this responsibility, you carry not only the hopes of the Nigerian Society of Engineers, but the shared hopes of a continent that believes engineering can be a force for unity, dignity, and transformation. May your tenure be marked by wisdom in decision, courage in action, and generosity in leadership. May it bring our institutions closer, our professionals stronger, and our societies better. And may history say that in this season, engineers did not stand on the sidelines, they stepped forward and helped shape Africa's tomorrow.

Congratulations, and Godspeed.

## GOVERNMENT COLLEGE, MAKURDI

### CLASS OF 1978

#### CONGRATULATORY MESSAGE FROM GOVERNMENT COLLEGE MAKURDI OLD BOYS ASSOCIATION, CLASS OF 1978 (MOBA '78).

Today, we the members of MOBA '78 celebrate an icon, our Class Chairman, Engr. A. A. Rabiu MFR, FNSE, F. ASCE, FAEEng, Cigarin Lafia Bari -Bari and Member, Lafia Emirate Council on his official Investiture as President of the Nigerian Society of Engineers! (NSE)

MOBA '78 are especially proud, greatly honored and delighted as you ascend the most prestigious position of leadership of Engineers in Nigeria, a profession you have cherished, sought for and assiduously worked hard to belong right from our days at Government College Makurdi in the early 1970s. The pathway to this height then was more defined through your passion for anything Technical, leading to your adopted name "Ali GTTS KURUM" meaning "GTTS (Government Technical Training Schools) or nothing"

Engr. A. A. Rabiu is and has remained one of the most distinguished members of MOBA '78 and through him, the Flag of our old School and that of our Class has been carried to all the four corners of Nigeria in the discharge of his Professional, State and National assignments.

Engr. A. A. Rabiu is an Engineer's Engineer and we at MOBA '78 felicitate with the Nigerian Society of Engineers for the honour of electing him President. He is a great son of Nigeria, a traditional title holder and member of the great Lafia Emirate Traditional Council, a core professional and an astute administrator.

Congratulations, Mr. President! We pray for more success in your endeavors and ground breaking achievements as President, NSE!.

Signed.

For: MOBA '78

“  
*In the North East, climate action is about dignity, livelihoods, and hope; a just transition that leaves no one behind.”*”

## Foreword from the Managing Director/CEO

### *From Fragility to Climate Innovation*

*For too long, the North East has been defined by what conflict and climate have taken away. Today, the region is writing a different story one of recovery, resilience, and innovation.*

The North East Development Commission (NEDC) was established to lead stabilization and development in this fragile but hopeful region. Our mandate is not just to rebuild what was lost, but to build better – systems, livelihoods, and opportunities that are sustainable for generations to come.

We know that development and climate action cannot be separated. That is why the NEDC is piloting one of Africa's largest subnational electric mobility programmes; it is why we are expanding solar irrigation schemes, restoring degraded land through community reforestation, and supporting youth cooperatives that transform waste into new economic value.

As the world gathers at COP30 in Belém, Brazil, we bring a clear message: climate action must be about people. It must reduce emissions, yes – but also lower transport costs, create new jobs, empower women, and strengthen peace in vulnerable communities.

Our work is guided by the North East Stabilization and Development Master Plan (NESDMP), a 10-year framework built around 11 pillars. Among them, Pillar 9 (Environment & Climate Change) and Pillar 10 (Renewable Energy & Energy Access) highlight our commitment to a just transition.

We invite governments, development partners, investors, and knowledge institutions to collaborate, co-finance, and share expertise with us. Together, we can turn fragility into resilience – and resilience into shared prosperity.

#### CONGRATULATORY LETTER

On behalf of the Board, Management and Staff of the LUBCON Group, I wish to congratulate you on your remarkable achievement as the 35th President of the Nigerian Society of Engineers. This prestigious appointment is a testament to your dedication, expertise, and leadership in the engineering community.

I commend your commitment to advancing the profession and contributing to Nigeria's development. Your vision and guidance will undoubtedly inspire and empower engineers to drive innovation and excellence.

I wish you a successful tenure, filled with wisdom, collaboration, and achievement. We look forward to working with you and supporting your initiatives.

Once again, please accept the assurances of my highest consideration, esteem and regards.

Sincerely yours,  
LUBCON Group

## CONGRATULATIONS

Dear Engr. Rabiu,

I am pleased to extend my warm and heartfelt congratulations to you on your assumption of office as the 35th President of the Nigerian Society of Engineers (NSE).

As a firm believer in the Holy Qur'an, which reminds us that the plan of Allah for His faithful is fulfilled at His appointed time, we give thanks to the Almighty for this moment. Your elevation to this esteemed position is a well-deserved recognition of your competence, discipline, and unwavering commitment to the engineering profession.

Over the years, you have consistently demonstrated professionalism, sound judgment, and a strong sense of responsibility—qualities that are indispensable to effective leadership. I am confident that you will discharge the duties of this high office with integrity, strategic vision, and dedication, in a manner that will advance the mandate of the NSE and serve the broader public interest. I encourage you to remain firmly guided by the principles of transparency, accountability, and service.

May this new chapter bring you fulfillment, greater opportunities, and the strength to meet every challenge with wisdom and grace. Aamin. You have my continued support and prayers as you contribute meaningfully to national development and the pursuit of institutional excellence.

Once again, congratulations. I am truly proud of you.

# *Felicitation*

FROM THE FAMILY OF  
**LATE ENGR. I. K INUWA,  
FNSE.FAEng. OFR**

The family of the late Engr. Ibrahim Khaleel Inuwa extends heartfelt congratulations to Engr. A. A. Rabiu, FNSE, FAEng, on his investiture as the 35th President of the Nigerian Society of Engineers (NSE). This landmark achievement is a fitting recognition of Engr. Rabiu's outstanding professional career, exemplary leadership, and unwavering dedication to the advancement of engineering practice in Nigeria. His elevation to the presidency of the NSE stands as a beacon of excellence and a source of inspiration to engineers across the nation and beyond.

For our family, this moment carries a deeply personal and emotional significance. Engr. A. A. Rabiu shares a bond with our late father and mentor that went far beyond professional association—a relationship rooted in brotherhood, mutual respect, and a shared vision for the engineering profession. His presence in our lives has remained constant, and his loyalty to our family has endured even after the passing of Engr. Ibrahim Khaleel Inuwa. His investiture is therefore celebrated by us not only as a professional triumph, but also as a continuation of a shared legacy.

We pray for divine guidance, wisdom, and strength as Engr. Rabiu assumes this prestigious office, and we wish him a tenure marked by innovation, unity, and lasting impact.

Signed:  
The Family of Late Engr. Ibrahim Khaleel Inuwa

### **FELICITATIONS**

Hearty congratulations on your well-deserved ascension to the leadership of our esteemed, **The Nigerian Society of Engineers**, as the **35<sup>th</sup> President**. This milestone, coming at a divinely appointed time, is a fitting reward for your perseverance and selfless service to the Society, both at the sub-national and national tiers; and also, your distinguished service as a Chief Regulator of Engineering in Nigeria.

You are assuming office with loads of institutional memory and track record of mentorship and stewardship, at a time, the growth trajectory of the Society is once again on the rise. These come with expectations, and so it behooves you to deploy your attributes of courage, hard work, industry, patience and reverence for Allah SWA, to accelerate this progress, so that within your tenure, the society may record sustainable quantum growth.

I have no doubt whatsoever that you will make a great **President**, that will make us all proud. Please be assured of my unwavering support, as always.

### LETTER OF CONGRATULATIONS

I write on behalf of the Management and Staff to warmly salute and congratulate you on your investiture as the 35th President of the Nigerian Society of Engineers (NSE).

Having worked closely with you over the years, I confidently attest to your vision, resilience, dynamism, integrity, and professionalism, qualities you demonstrated consistently during your tenure as President of the Council for the Regulation of Engineering in Nigeria (COREN). Your leadership at COREN was marked by exceptional administrative competence and effective strategic stakeholder engagement, which culminated in the transformation of the Council into a multifaceted institution recognized, noted for operational efficiency and enhanced regulatory capacity. This remarkable progress also earned COREN representation on the boards of several organizations.

I can proudly acknowledge your emergence as the 35th President of the NSE as a clear testament to your outstanding track record and distinguished career as an engineering practitioner. It is, indeed, a reflection of your lifelong commitment to service and to the advancement of the engineering profession.

My Chairman, I join the entire engineering community in saying: Mr. President, welcome to the position of the Number One Engineer in Nigeria.

Congratulations once again.

*Dear President Rabi'u,*

## CONGRATULATORY MESSAGE.

It is with great pleasure and gratitude to the Almighty Allah that I write on behalf of the management and staff of MBS Engineering Limited, to congratulate you on your ascension to the exalted position of the President of the Nigerian Society of Engineers (NSE). Your ascension to this top position did not come as a surprise to us having seen you served the Society meritoriously in various positions for almost three decades now. I believe your wealth of experience in your past positions will be brought to bear in elevating the Society to greater height than you met it in terms of peaceful coexistence between members, advocacy and creating opportunities and relevance for our members in this country.

Your success in this position is indeed our collective success for obvious reasons, and for this, our doors remain open to you at all times for any advice or contribution we can give to ensure you elevate the Society and its members.

I pray that Allah gives you the health, strength, courage and wisdom to enable you discharge this responsibility for the good of the engineers and the country.

My very best regards.

Dear Sir,

### **Message of Felicitation to the 35<sup>th</sup> President of the Nigerian Society of Engineers.**

On behalf of the Council and entire members of the Nigerian Institution of Mechanical Engineers (NIMechE), I wish to convey our hearty congratulations to you on your assumption of office as the 35<sup>th</sup> President, perhaps the largest professional engineering membership organization in Africa.

As members of your engineering constituency, we are optimistic that your exemplary leadership and professional experience will come to bear on your new official capacity to fast track the socioeconomic development of our dear nation through the mobilization and support of the entire Nigerian Engineering Community.

In view of your years of meritorious service to the engineering community, your engineering practice experience, organizational skills and benignity towards your professional colleagues, we are not in doubt that you will inspire Nigerian Engineers to higher levels of productivity in their commitment to national development.

While, we assure you of our unalloyed support always, we wish you wisdom and more grace to steer the affairs of our great Society - the NSE, to unprecedented heights.

Thank you and be assured of our esteemed regards.

President OF THE  
NIGERIAN SOCIETY OF ENGINEERS

## The Nigerian Institution of Safety Engineers (A Division of the Nigerian Society of Engineers)

*A New Chapter. A Steady Hand.  
A United Profession.*

**ENGR. ALI ALIMASUYA RABIU, FNSE, F.ASCE, FAEng, MFR**  
**PRESIDENT**  
 **The Nigerian Society of Engineers**

The Nigerian Institution of Safety Engineers (NISafetyE) heartily congratulates Engr. Ali Alimasuya Rabiu, FNSE, F.ASCE, FAEng, MFR on his investiture as the 35th President of the Nigerian Society of Engineers (NSE).

Engr. Rabiu's elevation is a powerful affirmation of integrity, professional excellence, and service-driven leadership. His journey reflects the values that define engineering at its best—competence, character, and commitment to national development.

As safety engineers and proud stakeholders within the NSE family, we look forward to a tenure that advances a safer, more resilient Nigeria.

Congratulations, Mr. President.

May your leadership leave enduring footprints on the profession and the nation as did your predecessor.

## CONGRATULATORY MESSAGE

### CONGRATULATIONS TO ENGR. A. A. RABI'U, FNSE, FASCE, FAEng, MFR

I, **Engr. Maimaje Ibrahim Abdullahi, FNSE**, wish to congratulate my Friend, and my brother indeed, **Engr. A. A. Rabi'u, FNSE, FASCE, FAEng, MFR**, on your historic emergence as the **35th President of the Nigerian Society of Engineers (NSE)** — the largest and most prestigious engineering association in Nigeria.

Your ascension to this exalted office is not only a personal triumph but also a resounding testament to your unwavering dedication, visionary leadership, and lifelong commitment to the engineering profession. It is a moment of pride for all who know you, and a beacon of inspiration for generations of engineers across our nation.

You have always stood as a pillar of integrity, wisdom, and courage. Today, the mantle of leadership rests upon your shoulders, and I am confident that under your stewardship, the NSE will soar to greater heights, advancing innovation, professionalism, and national development.

May this new chapter be marked by groundbreaking achievements, unity among engineers, and enduring legacies that will echo through time.

Once again, congratulations my dear Brother and Leader. The engineering family, Nigeria, and indeed Africa celebrate you.

Signed,

### CONGRATULATORY MESSAGE TO THE 35TH PRESIDENT OF THE NIGERIAN SOCIETY OF ENGINEERS (NSE)

**Engr. Ali Alimasuya Rabiu, FNSE, F.ASCE, FAEng, MFR**  
President, Nigerian Society of Engineers

Dear Distinguished President,

On behalf of the Executives and Members of the Nigerian Society of Engineers (NSE), Ilorin Branch, I heartily congratulate you on your assumption of office as the 35th President of our esteemed Society, the Nigerian Society of Engineers.

Your assumption to this high office is a clear testament to your outstanding professional credentials, visionary leadership, and sustained commitment to the growth and integrity of the engineering profession. Your wealth of experience, national and international exposure and exemplary service record inspire strong confidence that the NSE will witness continuous relevance, unity and strategic impact under your stewardship.

At a time when Nigeria urgently requires sound engineering solutions to drive sustainable development, infrastructure renewal and technological advancement, I am optimistic that your leadership will further position NSE as a leading voice in national development and professional excellence.

The NSE Ilorin Branch assures you of its unwavering loyalty, cooperation and full support in the successful implementation of your vision and programmes.

I pray that Almighty God will grant you divine wisdom, strength, good health and grace to lead with excellence. May your tenure be peaceful, impactful and crowned with enduring achievements.

Congratulations once again, Distinguished President.

Yours faithfully,

Abuja.

Dear Sir,

### CONGRATULATIONS ON YOUR INVESTITURE AS THE 35<sup>TH</sup> PRESIDENT AND CHAIRMAN-IN-COUNCIL OF THE NIGERIAN SOCIETY OF ENGINEERS

On behalf of the Automotive and Locomotive Engineers' Institute (AutoEI), a Division of the Nigerian Society of Engineers (NSE), and on my own behalf as the National Chairman, I heartily congratulate you on your investiture as the 35th President and Chairman-in-Council of the Nigerian Society of Engineers on Saturday, 17<sup>th</sup> January 2026.

This well-deserved elevation is a testament to your decades of exemplary service to the engineering profession, your outstanding leadership, and your unwavering commitment to national development. Your rich professional pedigree, sterling character, and visionary outlook inspire confidence that the NSE will continue to advance in relevance, integrity, and impact under your stewardship.

AutoEI is particularly encouraged by your consistent support for professional capacity development, indigenous engineering solutions, and strategic engagement with industry and government. We are confident that your tenure will further strengthen divisions, enhance inter-sectoral collaboration, and reposition engineering as a critical driver of Nigeria's industrialization, infrastructure development, and technological innovation.

As you assume this noble responsibility, we assure you of AutoEI's unflinching loyalty, cooperation, and support in actualizing your vision for a stronger, more united, and globally respected Nigerian Society of Engineers.

Once again, accept our warm congratulations on this historic milestone. We wish you a most successful, impactful, and fulfilling tenure in office.

# Congratulations

Congratulatory Message on Your Investiture

Dear

**Engr. Ali Alimasuya Rabiu,**

FNSE, FAEng, F.ASCE, MFR,

It is with profound respect and heartfelt joy that I extend my warmest congratulations on the occasion of your **investiture as the 35th President of the Nigerian Society of Engineers (NSE)**. This momentous ceremony marks not only a significant milestone in your distinguished career but also the beginning of a new chapter of leadership for our venerable professional body.

Your illustrious journey—characterized by exemplary technical expertise, visionary leadership, and an unwavering commitment to the advancement of engineering in Nigeria—has earned you the admiration and trust of colleagues, peers, and the broader engineering community. Your election to this esteemed office is a fitting recognition of your contributions and a testament to the confidence placed in your ability to guide the NSE through the challenges and opportunities that lie ahead.

As you assume the mantle of leadership, I am confident that your strategic insight, collaborative spirit, and dedication to excellence will inspire innovation, foster unity, and drive the Society toward greater heights of professional relevance and societal impact. Under your stewardship, the NSE will undoubtedly continue to be a beacon of technical proficiency, ethical practice, and sustainable development in Nigeria and beyond.

May this investiture usher in a tenure marked by remarkable achievements, meaningful partnerships, and lasting legacy. I look forward to witnessing, and where possible supporting, the transformative initiatives and milestones that will define your presidency.

Please accept my sincere best wishes for a distinguished and rewarding term as the 35th President of the Nigerian Society of Engineers.

Warm regards,

**Engr. Francis Oriakhi**

## GOODWILL MESSAGE to the **35th PRESIDENT** OF THE NIGERIAN SOCIETY OF ENGINEERS

The Chairman and Executives of the Nigerian Society of Engineers (NSE), Benin Branch, extend their warmest congratulations and profound goodwill to \*Engr. Ali Alimasuya Rabiu, FNSE, FAEEng, MFR (CIGARIN Lafia)\* on the momentous occasion of his investiture as the \*35th President of the Nigerian Society of Engineers\*. This historic milestone is a fitting recognition of an illustrious professional journey defined by visionary leadership, technical excellence, selfless service, and an enduring commitment to the growth of the engineering profession in Nigeria.

Your emergence as President represents not only personal merit, but the collective confidence of Nigerian engineers in your capacity to provide purposeful leadership at a critical period in our nation's development. Your record of service within the Society and the wider engineering ecosystem inspires great confidence that your tenure will usher in renewed institutional strength, enhanced professional relevance, robust capacity development, ethical practice, and strategic engagement with government, industry, and international partners.

The NSE Benin Branch is particularly encouraged by your passion for inclusiveness, mentorship of young engineers, and the elevation of Nigerian engineering to global standards. We are assured that under your stewardship, the Society will consolidate its role as a respected voice in national policy, infrastructure development, and technological innovation, while safeguarding the welfare and dignity of its members.

As you assume this distinguished responsibility, we pledge the unwavering loyalty, cooperation, and full support of the Chairman and Executives of the NSE Benin Branch in the realization of your vision and the advancement of the Society's noble ideals. We pray that your tenure will be marked by wisdom, strength, impactful reforms, and enduring legacies that will resonate across generations of engineers.

Once again, please accept our heartfelt congratulations and best wishes for a highly successful, transformative, and memorable presidency.

# Congratulations!

On behalf of the Executive Committee, and the entire membership of The Nigerian Society of Engineers (NSE), Asaba Branch, I extend our warmest congratulations to **Engr. Ali Alimasuya Rabiu, FNSE, F.ASCE, FAEEng, MFR**, on his investiture as the 35th President of The Nigerian Society of Engineers.

Your emergence as President at this defining moment in our nation's engineering journey is a testament to your exceptional professional pedigree, visionary leadership, and decades of selfless service to the engineering profession both nationally and internationally.

The Asaba Branch of NSE is particularly confident that your presidency will further strengthen professional ethics, promote capacity building, deepen collaboration across disciplines, and reposition Nigerian engineers as key drivers of sustainable infrastructure, innovation, and economic growth. We are optimistic that your leadership will inspire the next generation of engineers while reinforcing the Society's relevance in national policy and global engineering discourse.

As you assume this noble responsibility, we assure you of the total loyalty, cooperation, and support of the NSE Asaba Branch towards the successful realization of your vision for the Society. Once again, we congratulate you on this well-deserved honour and wish you a successful, impactful, and memorable tenure as President of The Nigerian Society of Engineers. Special Edition for NEDC at COP30

## ABOUT THE NORTH EAST DEVELOPMENT COMMISSION (NEDC)

The North East Development Commission (NEDC) was established in 2017 by an Act of Parliament to **coordinate and drive the reconstruction, rehabilitation, and long-term development of communities affected by conflict in Nigeria's North East.**

NEDC Governing Board

### Our Mandate:

To coordinate recovery, stabilization, and long-term development of the North East through integrated planning, delivery, and partnerships.

### Our Vision:

To serve as a model institution for driving recovery and sustainable development in fragile and conflict-affected regions.

### Our Mission:

To implement transformative programmes that restore systems, unlock opportunities, and rebuild dignity for the people of the North East.

### Approach (as valued by partners):

- Region-wide strategy aligned with Nigeria's national commitments and the Paris Agreement.
- Community-based delivery rooted in unions, cooperatives, and traditional institutions.
- Evidence-driven implementation with routine monitoring, feedback loops, and public accountability.

Mr. President,

**CONGRATULATIONS ON YOUR ELECTION AS THE 35TH  
PRESIDENT OF THE NIGERIAN SOCIETY OF ENGINEERS**

On behalf of the Management of T.E.A.M. Nigeria Limited, I extend our warm congratulations on your election as the 35th President of the Nigerian Society of Engineers.

Your emergence reflects a distinguished record of professional leadership and service to the engineering community. We are confident that your tenure will further strengthen institutional standards, professional ethics, and the relevance of engineering practice to Nigeria's development agenda.

As an organization actively engaged in the delivery and supervision of major infrastructure projects across the country, we share your commitment to excellence, capacity development, and the advancement of engineering practice in Nigeria.

We look forward to the positive direction your leadership will bring to the Society and to opportunities for constructive engagement in support of its objectives.

Please accept our sincere congratulations and best wishes for a successful and impactful tenure.

Yours sincerely,

Dr. Fillipo Macchioni  
Managing Director.
