FROM THE PRODUCER'S DESK:

West Africa is witnessing a healthy period in construction growth supported by robust Government aides for housing and infrastructure projects. Foreign investors are eyeing the West African countries, lead by Nigeria's construction market as expenditure hits **\$2.2 billion**.

The Architecture, Engineering and Construction (AEC) sector are realizing the impact Digital Transformation has on their projects and business in both the short and long term. They believe it is the Need of the Hour to be BIM compliant and utilize the right tools and systems that will lead to timely, budgeted and efficient projects – be it an individual or a conglomerate.

The **2-day West Africa: Digital Construction 2019** in Lagos will explore the BIM process and discuss the legacy systems that need to be replaced to implement advanced technologies and processes to develop skilled professionals for sustainable project life-cycles.
