Company Profile

Mouka is Nigeria's leading manufacturer of high-quality sleep solutions. As an international player, Mouka aims to become the market leader in the sleep industry of Africa.

Our Quality

The Mouka brand name is synonymous with quality. We have been producing sleep products of unrivalled quality since 1959. Our expertise in maintaining this consistency is driven by a combination of state-of-the-art technology we employ in crafting our products and the determination of our people to add comfort to life every day. We were the first company in Nigeria to offer a quality warranty on its products, a testament to our confidence in our brands.

Our Reach

Mouka products are available in over three thousand branded outlets across Nigeria through our extensive network of distributors, sub-distributors, modern retail outlets, Sleep Galleries and eCommerce platforms. With manufacturing facilities in Lagos, Benin and Kaduna and numerous depots spread across the nation, Mouka is able to serve its highly esteemed customers. As a member of the Dolidol International Group, Mouka's footprint now extends beyond Nigeria.

Our History

The foundation of our great company was laid in 1959 by the Moukarim family of Lebanese origin in Kano. For many years, Mouka was majorly owned by leading international investment firms. In late 2021, the Morocco-based Dolidol International Group facilitated a seamless change of ownership of Mouka. This strategic change promises greater things to come due to the ground-breaking innovation and technological expertise Dolidol brings to Mouka. The Dolidol International Group is the undisputed market leader in the sleep industry in Francophone Africa.

WHY CHOOSE MOUKA?

1. Unmatchable Product Architecture

Mouka products are specially designed to:

- Give the right body support, thus ensuring the spine is in the natural position during sleep.
- Offer proper pressure relief for the optimal blend of comfort & support
- Provide good ventilation that allows air to circulate for easy breathing & prevents excessive sweating so you sleep well, wake up refreshed and ready to take on the day.

2. Recognised and Certified by The Experts

(a) MANCAP Certified

Mouka possesses the SON Mandatory Conformity Assessment Programme (MANCAP) certificate for each product in its assortment. The company is one of the few players in the industry to comply with Nigeria's Industrial Standards consistently. In recognition of its outstanding efforts in quality management, the company has received excellence awards from various authorities, such as the Standards Organisation of Nigeria (SON) and the Manufacturer's Association of Nigeria (MAN).

(b) ISO Certified

Mouka has a long history of prioritizing quality and safety in its operations. Leading industrial breakthroughs and business excellence are also at the forefront of its agenda. In 1992, Mouka spearheaded the end of Chlorofluorocarbon (CFC) for Flexible Polyurethane Foam production in Nigeria, as evidence of its quality and safety mantra. The management seeking to sustain this foundation subscribed to Quality Management Systems (QMS) ISO 9001:1994, becoming the first to be certified in the industry on November 26, 1999. On April 29, 2003, Mouka received the Environmental Management System (EMS) 14001:1996 certification, which resulted in visible gains such as better risk management, regulation compliance, and improved decision-making. On June 6, 2011, Mouka obtained certification for the new versions of QMS 9001:2008, 14001:2004, and the Occupational Health and Safety Assessment System (OHSAS 18001:2007). On January 19, 2015, Mouka was re-certified for QMS 9001:2008, EMS 14001:2004, and BS 18001:2007. With visible gains, harmonization of operations across locations, and international recognition, Mouka was inspired to opt for the Integrated. On February 2, 2018, Mouka received its first Integrated Management System (IMS) Certificate QMS ISO 9001:2015, EMS 14001:2015, and OHSAS 18001:2007. Again, this feat was sustained with the revalidation of the IMS on February 2, 2021, in addition to converting its BS 18001:2007 to ISO 45001:2018.

The ISO management systems provide a structured approach to managing various aspects of the organization, resulting in improved employee engagement, operational efficiencies, consumer satisfaction, and other notable business developments.

(c) The Nigeria Society of Physiotherapy Endorsed

The NSP exclusively endorses Mouka's Well-being range of Orthopaedic mattresses and its Mondeo spring mattress range. According to its President, the society critically examined Mouka's production processes, facilities and final products before giving the endorsement in 2019.

Medical experts from the Nigeria Society of Physiotherapy (NSP) have strongly recommended Mouka's brands for quality sleep, which is necessary for sound mental and physical health. The society has certified these products as ergonomically compliant and made to international standards.

According to the NSP, sleeping on a good quality mattress like Mouka's is required for healthy sleep, which is critical for the proper functioning of the body, including immune function, tissue healing, pain modulation, cardiovascular health and cognitive functions such as learning and memory. The right mattress will cushion the pressure points around the body and align the spine in a neutral position. The partnership between both parties still stands to date.

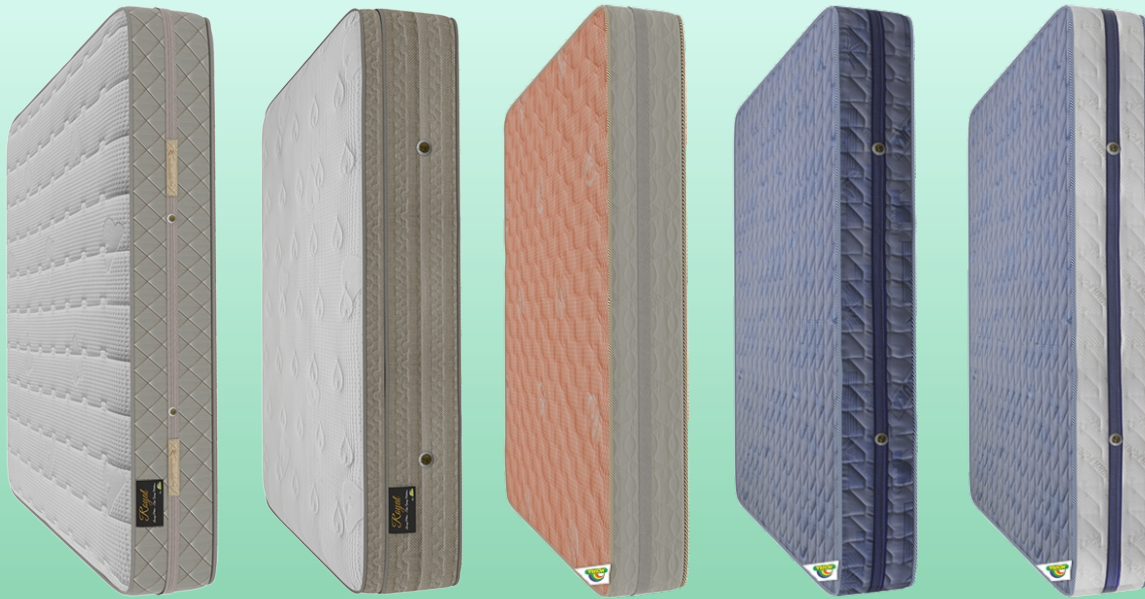

(d) National Association of Orthopaedic Manual Therapists Endorsed

Mouka is exclusively endorsed by the NAOMT. Mouka earned this endorsement by consistently delivering quality sleep solutions and setting innovation trends. The endorsement translates to a ten-year partnership between the brand and the association. Both parties signed a memorandum of understanding (MoU) to seal the mutual relationship on Friday, 4 October 2019. The company believes that the partnership with NAOMT sets a new benchmark for the brand in quality delivery. This partnership is three-pronged and includes product endorsement and collaboration in research. The association also conducts routine inspections to ensure Mouka's manufacturing facilities are of world-class standard and that the claims made on Mouka products remain valid. Mouka and NAOMT continue to work together to engineer new products to meet the physiological needs of the Nigerian consumer.

GET THE MOUKA FOR YOU

To suit your weight, age, lifestyle and budget

CLASSIC FOAM PILLOW

- Made with 100% resilient foam crumb, evenly shredded to provide head and neck support

**DOCTORS
RECOMMEND
THAT YOU
CHANGE YOUR
PILLOWS EVERY
1 OR 2 YEARS**

WHY SHOULD YOU REPLACE YOUR PILLOWS OFTEN?

- By replacing your Pillows regularly, you can avoid waking up with aches & pains.
- Every night as you sleep, your body sheds skin, hair, & body oil that your Pillows absorb.
- Over time dust mites begin to grow in your Pillows. These tiny creatures also add extra weight to your Pillows & impair their ability to stay supportive.
- Our heads are heavy, and bearing the weight of your head night after night will eventually wear your Pillows out and cause it to flatten in spots.

WHEN SHOULD YOU CHANGE YOUR PILLOWS?

You should change your Pillows if you notice any of the following:

- You notice lumps in the Pillows.
- There are noticeable, permanent stains from body sweat and oil.
- You wake up with aches and pains, particularly in your neck or shoulders.
- You wake up tired (due to the above aches and pains interrupting your sleep).
- You wake up sneezing from the dust mites.
- You constantly have to re-fluff your Pillow to get comfortable.
- If you fold your Pillow in half, it stays that way instead of regaining its original shape.

HOW OFTEN SHOULD YOU REPLACE YOUR PILLOWS?

- On an average, replace your Pillows every 1 to 2 years except otherwise indicated.
- Certain types of Pillows last longer than others, due to their composition

PILLOW CARE TIPS

- Use a Pillow case to protect your Pillows and change weekly.
- Wash your Pillows every 6 months following the manufacturer's instructions. (Not all pillows are washable. others may need to be dry cleaned or spot cleaned).
- If your Pillow has feathers or shredded material for filler, fluff it daily to help it maintain its shape.

Our Lifestyle Portfolio

MATTRESS TOPPERS

Wellbeing TOPPER

- Wellbeing Topper is a plush layer built with memory foam that delicately molds the body. It conforms to the body's natural curves while providing pressure relief. It protects the mattress underneath, elongating its lifespan.
- Wellbeing Topper is commonly used with orthopaedic mattresses as an extra comfort layer and is recommended for homes and hotels.

Fiesta TOPPER

- Fiesta Topper is a layer of high-resilience foam that fits on the top of the mattress, delicately supporting the body.
- It is commonly used on orthopaedic mattresses as an extra comfort layer. It provides pressure relief to the body and protects the mattress underneath while elongating its lifespan.
- It is recommended for homes and hotels that require dual comfort ratings.

Out of Home Solution

Out of Home Solution

FOLDY MATTRESS

Foldy Mattress is a foldable mattress that can be transported easily or folded away discretely when not in use.

CAMP MAT

Camp Mat is a trendy and versatile solution that can be used in-home or out-of-home such as for picnics and relaxation at the beach.

EXERCISE MAT

Exercise Mat is the perfect companion for the visit to the gym or physiotherapist. It provides a cushioned surface to protect joints and muscles during exercise.

LUMBAR ROLL

Lumbar roll is a support tool used in supporting the lower back while in a sitting position to maintain the S curve of the spine. It is attached to car seats, office chairs and anywhere that extra support is needed.

Adding comfort to life
